PROFESSIONAL SUMMARY

Software Engineer Student with hands-on experience building full-stack applications for real businesses using Django, FastAPI, and MySQL. Proven ability to deliver production-ready systems transforming manual operations into scalable digital solutions.

WORK EXPERIENCE

Software Engineer Intern

LokhandWala Web Solutions House

Sept '25 – Oct '25

Karachi, Pakistan

- Developed Internal Task Portal using Django and Python, implementing secure employee authentication, role-based authorization, and separate dashboards for administrators and employees.
- Completed the entire application independently within 3 weeks while adapting to evolving project requirements under manager supervision.
- Engineered complete backend functionality including SQLite database schema design, Django ORM models for users/projects/tasks, and CRUD operations for project and task management.
- Built responsive frontend interfaces featuring sortable task lists, deadline tracking, and detailed project/task views using HTML, CSS, and JavaScript with Django templating.

PROJECTS

Student Information System (SIS)

Tech Stack: FastAPI, MySQL, HTML, CSS, JavaScript

Jan '26 – Present

- Developing a comprehensive database management system to digitize paper-based student records for Vibrant Academy serving 200+ students and 7 staff members.
- Designing and implementing MySQL database schema with raw SQL queries to manage student enrolment, attendance tracking, grade management, fee collection, salary records, and automated report generation.
- Building RESTful API backend using FastAPI and Python to handle CRUD operations and business logic for all academy management modules.

E-Commerce Website for TQ Style Jewellery

Tech Stack: Django, MySQL

Jan '26 – Present

- Developing a full-featured e-commerce website for an established jewellery store with 14K+ Facebook followers and 5 years of physical/social media sales presence.
- Building Django-based backend with MySQL database to manage product categories, customer inquiries via contact forms, and WhatsApp-based order processing integration.
- Implementing product browsing functionality with 500+ jewellery items, customer review system, and responsive catalogue showcase to expand the store's online presence.
- Migrating from SQLite to MySQL database to handle production-scale data and support growing business operations beyond Facebook and physical sales channels.

EDUCATION

Bachelor of Software Engineering (BSSE)

FAST National University

Aug '24 – Aug '28 (Expected)

Karachi, Pakistan

TECHNICAL SKILLS

Languages | Python, JavaScript, Java, C, C++, HTML, CSS, SQL

Frameworks | Django, FastAPI, React, Bootstrap, Tailwind CSS, jQuery

Developer Tools | Git, GitHub, VS Code, IntelliJ IDEA, Postman, MySQL Workbench, Chrome DevTools

Databases | MySQL, SQLite
